The

Corporate Governance Statement 2012

Board of Directors of Lännen Tehtaat plc confirms annually the Group's risk policy, risk management principles and key risk limits.

To ensure implementation of the Group's ownership policy towards the Group companies and to monitor the effectiveness of internal control, the boards of directors of the main Group companies include one or more members of the Group's Corporate Management. Group-level risk management and financial reporting are performed on a centralised basis in the Group Administration, independent of the different business activities. The boards of directors of the Group companies are responsible for the highest level of management duties related to the internal control of their respective companies. The operating organisation's management in each of the Group companies is responsible for the implementation of internal control and risk management in line with the pre-determined principles and operating guidelines, and for reporting on the company's operations, risk-bearing ability and risk situation in accordance the Group's management system.

3. Implementation of internal control within Lännen Tehtaat plc and the Group companies

The main principles of internal control observed within Lännen Tehtaat plc and the Group companies are:

Organisational structure and division of tasks

The basis for internal control is the function-specific line organisation that is further divided into departments, units and teams, as necessary. The organisational units are allotted defined tasks and responsibilities required for the company's operations. The task of the operating organisation's management, i.e. the managers of the Group's business areas and operations, is to set quantitative and qualitative targets for the various areas of the business in accordance with the business plan approved by the Board of Directors. For the units,

decision-making bodies and people operating within the framework of the organisation there are separately defined decision-making and operating powers set out in work and job specifications, as well as obligations to report to one's superiors or otherwise to a higher organisational level. The task of the operating organisation's management is to ensure that those working under them are familiar with their own duties, and the management are required to create the right conditions for their personnel to be able to perform their work and achieve the targets.

Decision-making and monitoring

Significant commitments or other actions deemed to carry certain risks are subject to the approval of the Board of Directors of Lännen Tehtaat plc. Business units are responsible for formulating proposed decisions and for putting decisions into effect. Reporting on the implementation of decisions is made in connection with the management reporting.

Business activities and processes are guided within the confines of operating guidelines and descriptions, which are monitored to ensure they are complied with and kept up-to-date. All decisions taken are documented and archived. An essential aspect of risk management is the performance of daily controls in the operating chains and processes.

Risk management

The internal and external risks of Lännen Tehtaat plc and the Group companies that could have an adverse effect on achieving business targets are identified, assessed regularly and reported quarterly to the Board of Directors. The risks are contained and the confining limits are monitored.

The Group Administration's risk management has the task of monitoring, measuring and reporting risks and of maintaining, developing and preparing risk management principles for the Board of Directors' approval, and of drafting procedures for use in risk assessment and measurement. Roles and responsibilities are defined in Lännen Tehtaat's risk management policy and risk management principles,

which are approved by the Board of Directors of Lännen Tehtaat plc.

Data systems

The basis for business and other activities is provided by the accounting, information and business IT systems. The parent company and the Group companies have an IT strategy in accordance with currently assessed needs and sufficient and appropriately organised IT systems. The IT function ensures that the company's data resources can be utilised in the planning, management, execution and monitoring of the company's business.

Responsibility for the effectiveness of internal control

The operating organisation's management has the primary responsibility for ensuring the implementation of practical measures for internal control. The management must constantly monitor operations and must take the necessary development measures if action contrary to guidelines or decisions or action that is otherwise ineffective or inappropriate is observed. In a transparent and effective organization the entire personnel are all responsible not only for the appropriate discharging of their own duties but also for the fluency of operations with the rest of the organisation.

4. Reporting and management systems

Internal control is supported by appropriate reporting that allows monitoring of operations, results and risks. Achievement of the business targets and developments in the Group's financial situation are monitored with the aid of a Group-wide management system. The Group's accounting principles, controls and responsibilities are described in the Lännen Tehtaat Group's accounting manual. Reporting guidelines and timetables have been drawn up in writing for monthly reporting and preparation of interim reports and annual financial statements. The parent company's financial management unit constantly monitors the business units' reporting and develops and produces guidelines on the content of reporting, taking into account the needs of

internal control. The Group prepares financial information for publication, complying with the international financial reporting standards (IFRS). Interim reports and the annual financial statements are reviewed by the Board of Directors of Lännen Tehtaat plc and are subject to its approval.

The business units update the long-term financial estimates each year. The annual budgets are prepared on the basis of these strategic figures. The Board of Directors of Lännen Tehtaat plc assesses and approves the business units' annual budgets. In addition, on a quarterly basis or more often, the business units update the profit and balance sheet estimates to cover at least the ensuing 12 months.

The monthly reporting and the related analysis for budgets and estimates constitute a key element of Lännen Tehtaat's management system and internal control. Financial figures are assembled from the business units' data systems every month for the Group's joint accounting system. The outturn information and up-to-date estimates are reviewed monthly in Group-level results meetings, which are attended by the CEO, the Chief Financial Officer (CFO) and those in charge of the Group's accounting. The monthly reporting system comprises the actual profit and balance sheet information, the key figures and the written management report of those responsible for the businesses.

The management report covers the factors affecting the results given in the month's report, the measures planned for the immediate term and an assessment of the operating profit for the current quarter and the full year, consisting of best case, probable and worst case scenarios.

The Group CEO and members of the Corporate Management are issued with the reports, and the Board of Directors of Lännen Tehtaat plc is issued with a summary for the Group and summaries of the data for each business

unit. The business units' management groups examine their own financial outturn data at least once a month for budgets and estimates and also the various units' monitoring measurements for estimates and targets used for business management purposes, and the reasons for any significant discrepancies between these.

5. Internal audit

The internal audit unit functions objectively and independently supporting the Board of Directors, the CEO and Group Administration, for the purpose of assessing and developing the level of internal control by providing an independent and objective assessment and advisory service for risk management and monitoring processes within the organisation. Internal audit is performed on the basis of a pre-determined plan. The internal audit is overseen by the Group's CFO, who submits the annual audit plan to the parent company's Board of Directors for its approval.

Lännen Tehtaat's internal audit is independent of all operating units in Finland and abroad. The internal audit is performed by an employee who is part of the Group Administration and whose job description also includes group accounting and other group-level tasks. The manager-employee relationship in Group Administration regarding these other tasks leads to a situation where the internal auditor is unable to independently audit the areas of responsibility covered by Lännen Tehtaat's Group Administration.

Internal audit reports annually in writing to the Lännen Tehtaat plc Board of Directors on the audit findings and areas for improvement in internal control. Where necessary, the internal audit also reports on individual audit findings during the annual planning period to the Board of Directors.
